

## NOVYRATE® EB PLUS

<b>Scope</b>	The increasing animal genetic potential puts a significant stress on the animals' digestive system, often leading to a suboptimal digestive process and nutrient absorption. The negative impact of sub-optimal feed utilization has a significant impact on the economical viability of the farm. Mono-butyric acid is an important dietary component that can help balance and stimulate a healthy intestinal microflora.
<b>Description</b>	Complementary feed. A synergetic combination of Esterified Butyrins, with immediate activity in the early part of the intestinal tract, and a prolonged effect towards the hindgut.
<b>Components</b>	Esterified butyric acid, flavour compounds, carrier and anti-caking.
